Area T-Shirt Vendors & Design Tips

Design Tips:

Keep the number of fonts very limited.

Use computer generated graphics or hand drawn graphics scanned and saved at a very high resolution.

Ask the company how you should provide the graphic to them, by email? If so, what formats can they accept and work with?

For maximum impact: Have someone not affiliated with your group proof your design. Are there any misspellings or grammatical errors? Have you included your organization's name? Any relevant dates? Is "Winthrop University" somewhere on the shirt? Would someone from the general public understand your shirt? Does the design reflect well upon your group?

Save Money!!

Order your shirts in advance to avoid rush charges.

Limit the number of colors you wish to print. Fewer colors require fewer screen set-ups and less time to print additional colors.

Limit the number of locations on the t-shirt. Additional screen and printing charges may apply if you want to add additional locations.

Order white or light colored t-shirts. T-shirt manufacturers charge more for dark colors and printing on dark shirts requires printing a white "underlay" to avoid the dark color bleeding through the design.

The more you buy, the more you save!! Order in large quantities and your price per shirt can go down dramatically.

Do not compromise quality - always order 100% cotton, and purchase brand name, heavyweight t-shirts.
