PROPOSED CRITERIA FOR THE SOCIAL SCIENCE REQUIREMENT, WITH THE GENERAL EDUCATION COMMITTEE'S EDITS OF THE WORKING GROUP'S SUBMISSION:

Social Science courses are required to meet each of the following criteria:

1. The course must have social science as its primary focus. Included courses have a conceptual, philosophical, and theoretical orientation as opposed to one that is technical, quantitative or applied. ~~have a broad, liberal arts orientation.~~ Courses that are “applied” or have a pre-professional function may be too narrowly defined to fit the purposes of general education. The same holds for statistics and research methods classes in social sciences, co-ops, and internships. Briefly confirm the course ~~has a broad liberal arts orientation.~~ meets the above requirements.
2. The course ~~allows insight into~~ addresses the diversity of human interaction and behavior and institutional forces that influence human interaction and behavior. How does the course meet this requirement?
3. The course ~~recognizes-explores~~ one or more methods of inquiry used in the social sciences and appropriate ethical applications. How does the course meet this requirement?
4. The course communicates ideas and explains concepts using the language of the social sciences. The course also includes a writing component; a single paper or a combination of assignments totaling eight pages of evaluated writing, or at least four evaluated writing assignments. How does the course meet these requirements?
