Add LibGuide Resources to a Course Using the Automagic Tool

Overview

This tutorial will show you how to add the automagic version of **LibGuides Resources to a Course**. The automagic version will display library resources relating to the course's subject that have been setup by a Dacus Library Librarian.
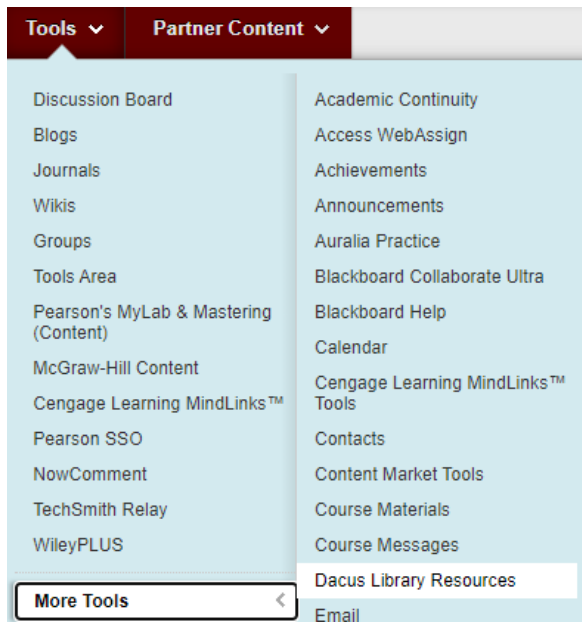

! *If a parent course has been created, you will want to add the LibGuides resources via the manual option.*

Quick Steps

Content Area > Tools > Dacus Library Resources > Available to Users > Submit > View LibGuides

Step 1

In your Blackboard course, navigate to a Content Area, hover over *Tools* on the Action Bar, and select "Dacus Library Resources" [1].

⚠ *If Dacus Library Resources does not appear in the list, click More Tools then select Dacus Library Resources.*

Step 2

It is recommended to leave the "Link Name" as the default of "Dacus Library Resources" [2].

LINK INFORMATION

⚹ Link Name   **2**   Dacus Library Resources

You can also choose to make the link available to users by checking the "Available" radio button [3].

OPTIONS

Available   **3**   ● Yes ○ No

Step 3

Click the *Submit* button to save and insert the Tool in the Content Area.

Submit

Step 4

Click on the Tool link to *View LibGuides* related to the course subject.

⚠ *This screen will launch in a new window.*

If there are no results returned, information similar to below will appear. Contact a Dacus Library Librarian for assistance in adding the subject matter to LibGuides.
