

Create an Accessible Link

Overview

This tutorial will explain how to create an **Accessible Link**. This process can be used for an Item, a Page, a Discussion Post, or any other area that hosts a Content editor.

Quick Steps

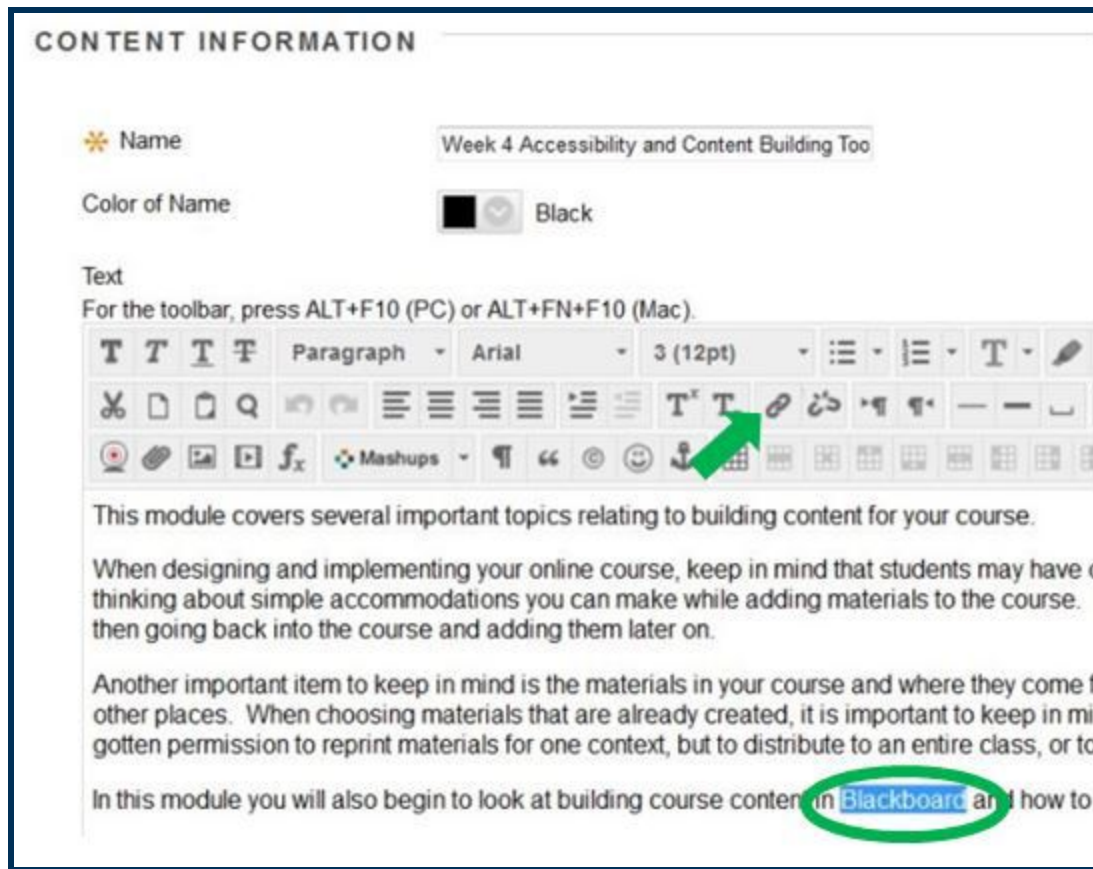

Type Link > Select Link text > Insert/Edit Link button > Set Options > Title field > Insert

Step 1

When using a Content editor, type the text you want to serve as a Link.

Step 2

Select the Link's text with your cursor and click the *Insert/Edit Link* button.

CONTENT INFORMATION

Name

Color of Name

Text
For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

Insert/Edit Link (highlighted with a green arrow)

This module covers several important topics relating to building content for your course.

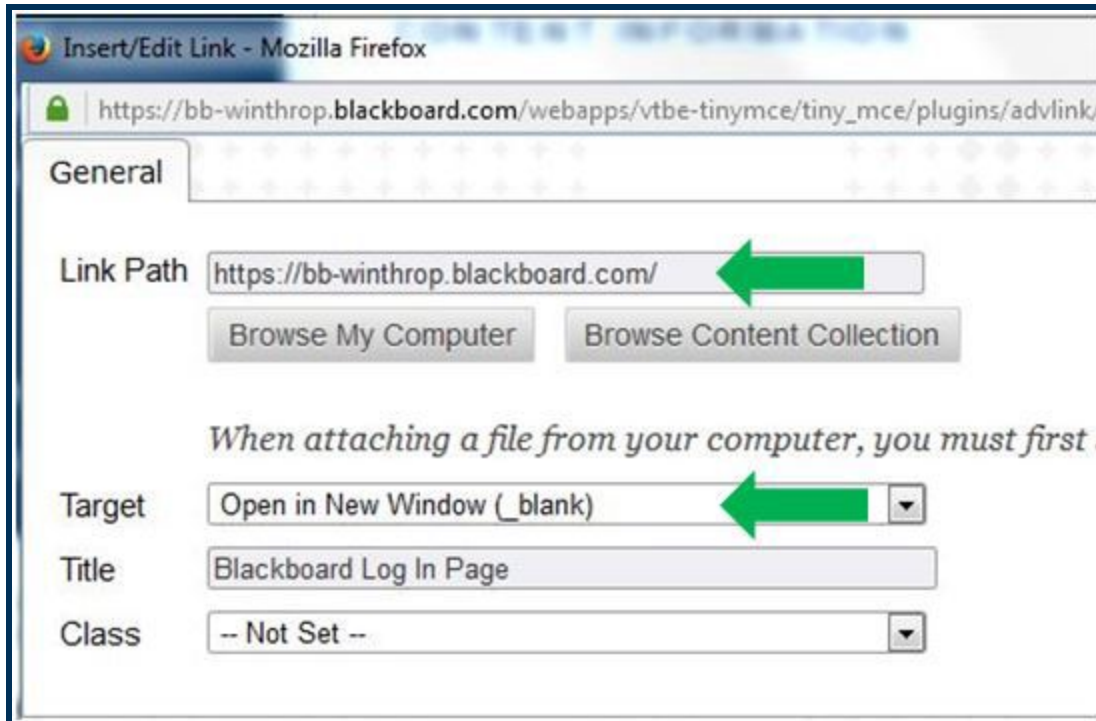

When designing and implementing your online course, keep in mind that students may have c thinking about simple accommodations you can make while adding materials to the course. then going back into the course and adding them later on.

Another important item to keep in mind is the materials in your course and where they come f other places. When choosing materials that are already created, it is important to keep in mi gotten permission to reprint materials for one context, but to distribute to an entire class, or to

In this module you will also begin to look at building course content in **Blackboard** and how to

Step 4

Enter the full URL you want users to visit in the Link Path box, and change the “Target” option to “Open in New Window (_blank.)” by using the drop-down field. This will prevent users from losing their place within your course.

Step 5

The “Title” field is used to set the Link’s hover text. Hover text is used by screen readers to provide individuals with visual impairments additional information about the Link. When completing this field, use descriptive language to describe the Link’s contents and/or location.

Step 6

Click the Insert button.
